

Trek PRS Rescue Stretcher

- The easiest and most versatile type of stretcher available, the PRS Rescue Stretcher is a new edition to the Trek range designed to make rescue operations easier and safer.
- Rigid composite plastic sheet for ultimate durability and strength, suitable for use in harsh weather conditions from -20°C to 45°C.
- Rigidity is maintained whilst the stretcher is folded around the patient, and is also suitable for vertical and horizontal lifting
- Includes carry handles, patient restraints, listing slings and equipment and a carry bag for convenience.
- Able to easily traverse terrain by simply pulling the stretcher along the ground with the patient safely restrained
