FASTAID
First Aid...for life

3 EASY STEPS TO CHOOSE YOUR FIRST AID KIT

STEP 1. Workplace Type
Tick only one of the options A-D that best describes your workplace type.

STEP 2. Other Risks
Identify and tick any or all of the other injury options E-G.

STEP 3. Choice & Quantity
Review rows that you have ticked. Select a kit that covers your Workplace type (A-D), other injuries (E-G), risk type and number of persons.

LOW RISK workplace means a workplace where workers **are not** exposed to hazards that could result in serious injury or illness such as **offices, shops or libraries.** Potential work-related injuries and illnesses requiring first aid would be minor in nature.

HIGH RISK workplace means a workplace where workers **are** exposed to hazards that could result in serious injury or illness and would require first aid. Examples of workplaces that may be considered high risk are: **mobile plant, manufacturing plants, construction, mining, trades, warehousing and food manufacturing.**

Disclaimer: This table is a quick guide only to choosing your First Aid kit. A full risk assessment should be conducted by qualified personnel for your workplace, to ensure the First Aid kit you choose meets your risks identified.
